PRESIDENT'S MESSAGE

Greetings!

CHANGE...a word that can evoke different sensations and trigger an equal amount of different responses. We live in an ever evolving environment where by the mere fact of breathing and living we are exposed to a continuous flow of transitional perceptions that ultimately define the reality we live in. I have always been fascinated by how we as human beings adapt to the ubiquitous shifting in our daily lives...from the subtle (and implacable) aging process to the ever present weather and seasonal transitions, to those more infamous mood alterations, to variations as banal as those related to fashion trends...

As I write these lines, the members of the American Academy of Periodontology are heading out to voice their support or opposition to modify the name of the institution that embraces and represents the largest number of periodontists in this country. I do not know what the outcome will be but I am certain that by the time you read this message you will have an unobstructed view of the outcome of this initiative. This situation is a fine example of how we as individuals react to change in our daily lives...either we bury our heads in the sand helplessly hoping for things to go away, or we let the winds of change carry us down the road like a tumble weed wishing to mercifully arrive at a safe harbor...or we muster up courage to rise to the occasion and face the challenge giving it our best to harness the hand we have been dealt with. Most of the time we react as individual entities to the different challenges and opportunities that we encounter in our life. Although flexible and somewhat unrestricted, operating solo has its limitations. When gathering together and acting as a collective body, the addition of individual talents, skills and strengths can be beneficial when dealing with situations that test our abilities, that push our coping limits, that question the status quo.

Organized dentistry is but one example of a group of individuals associating to embrace a commonality and advance a shared cause. The Midwest Society of Periodontology is a vibrant and living proof of what can be achieved when the call of a shared virtuous interest is answered selfishly by a group of individuals. During these years having been an active participant in this organization, I have come to appreciate, admire and enjoy the fruits of the volunteer-labor of many outstanding colleagues. The opportunity to offer a venue to spread knowledge, to equip our members with intellectual tools that when translated into the clinical environment can become powerful solutions that will ultimately benefit our patients is simply priceless.

Early next year we will have an opportunity to hone up our periodontal minds when we gather in February to participate in what promises to be an outstanding scientific program. I would like to acknowledge Dr. Gustavo Avila-Ortiz for his impeccable job in facilitating the materialization of this event. I would also like to express my gratitude to Dr. Greg Fauth for his support, wise counsel and guidance during the time that I have had the honor and privilege to serve this society.

Last, but not least, I would like to express my gratitude and sincere appreciation to all the volunteers serving in different capacities in the Midwest Society of Periodontology. Their love, passion and commitment to what they do is contagious and the best driver to embracing change and seeing it not only as a challenge but as an opportunity to expand our horizons, to grow and continue thriving in what I consider a beautiful profession, a privileged specialty. Periodontology is here to stay. The way we practice will surely change. Concepts will evolve. Technology will continue to reach unimaginable heights. And in the midst of it all, the periodontists, you and I, will be together to judiciously embrace change and channel all these efforts to deliver care to patients who will be the ultimate beneficiaries of all the positive aspects that come along with...change.

MEETING SCHEDULE

FRIDAY, FEBRUARY 26, 2016

12:15pm	Registration
1:00 pm	Dr. Chris Barwacz (additional fee/limited attendance) Sponsored by Dentsply Implants, North America
3:00 pm	Break/Set up for Hands-On portion
5:00 pm	Program ends

SATURDAY, FEBRUARY 27, 2016

7:30 am	Registration and Continental Breakfast
7:45 am	Graduate Student Forum Sponsored by Sunstar Americas
8:55 am	Introduction — Dr. Gustavo Avila-Ortiz
9:00 am	AAP President Dr. Wayne Aldredge
9:10 am	Dr. Anton Sculean Sponsored by Straumann, USA
10:30 am	Refreshment Break
10:50 am	Dr. Sculean
12:00 pm	Luncheon for Learning, 2nd Floor Discovery

SATURDAY, FEBRUARY 27, 2016 - CONTINUED

1:30 pm	Dr. Massimo Simion Sponsored by Geistlich and Osteogenics
2:45 pm	Refreshment Break
3:00 pm	Dr. Simion
4:00 pm	Midwest Society of Periodontology Business Meeting Graduate Student Event 2nd Floor Discovery
4:30 pm	District IV Meeting
5:00 pm	Awards Ceremony / Cocktail Reception 3rd Floor Cloud Gate 1 & 2 Hosted by Sunstar Americas

SUNDAY, FEBRUARY 28, 2016

7:30 am	Continental Breakfast
8:00 am	Dr. Greg Toback Sponsored by Zimmer/Biomet
9:45 am	Refreshment Break
10:00 am	Dr. Toback
12:00 pm	Adjournment

LUNCHEON FOR LEARNING

DR. HUI-JIN LEE — TABLE 1: METHODS AND TECHNIQUES IN MANAGEMENT OF MUCOGINGIVAL DEFECTS

- Methods and Techniques treating Mucogingival defects
- Minimally Invasive Surgery
- Use of AlloDerm and PRF

DR. JOHN ROSS — TABLE 2: “THE ABC’S OF BIOLOGICS IN PERIO”

- Compare and contrast the different blood concentrate techniques. Also, look at Emdogain, Gem 21, and Infuse as biologic options

DR. STEPHEN MERAW — TABLE 3: “MEDICAL BOOTCAMP FOR THE PERIODONTAL WARRIOR”

- Medical Assessment for Successful Treatment Planning
- Understanding the Intersection of Periodontal-Systemic Health & Disease
- Long-Term Maintenance in Periodontal Medicine

DR. ZAK MESSIEHA — TABLE 4: DENTAL ANESTHESIOLOGIST IN CHICAGO, IL

GENERAL ANESTHESIA AND SEDATION FOR PERIODONTAL SURGERY

- Outlining the different anesthesia modalities used during periodontal surgery
- Understanding the decision-making process in selecting a certain anesthesia technique versus another
- To discuss the advantages and potential risks of different anesthesia techniques
- To provide an understanding of the optimum level of preparedness to address any unexpected complications or emergencies

DR. MILTON GEIVELIS, — TABLE 5: EASY MANAGEMENT OF THE EXTRACTION SOCKET: A NEW ALLOPLASTIC BONE GRAFT SUBSTITUTE

- Discuss the choices available at the time of extraction
- Compare the different materials used for bone replacement
- Review cases using the new alloplastic bone material, histological analysis, and proper technique

JERRY ULASZEK — TABLE 6: PRESIDENT OF ARTISTIC DENTAL LABORATORIES - BOLINGBROOK, IL “DEMISTIFYING THE ALL-ON-4 PROCEDURE.”

The goal of the program is to learn how to educate the restorative dentist that there is a support team behind them so that they can feel confident in recommending this type of treatment to their patients.

ABOUT OUR SPEAKERS

Friday, February 26, 2016

**REGISTRATION AND BEVERAGES AT 12:15 PM
1:00 PM - 5:00 PM**

"IMPLANT PROVISIONALIZATION: PROTOCOLS FOR MAXIMIZING PERI-IMPLANT MUCOSAL OUTCOMES"

DR. CHRIS BARWACZ

The University of Iowa

Synopsis

Implant provisionalization concepts and protocols are rapidly being integrated into the periodontist implant workflow due to both patient and referral demand, as well as the recently adopted CODA-accreditation standard 4-10.2.d for North American Graduate Periodontics Programs requiring competence in this treatment regimen.

This half-day didactic and hands-on workshop will offer participants a comprehensive overview of considerations related to both immediate and delayed implant provisionalization in the esthetic zone, clinical techniques to facilitate both direct and indirect screw-retained provisionalization, as well as protocols that enable communication of the mature peri-implant mucosal architecture to the restorative referral and/or laboratory.

**THIS PRESENTATION MADE POSSIBLE BY SUPPORT FROM
DENTSPLY IMPLANTS, NORTH AMERICA**

Saturday, February 27, 2016 Session 1

**REGISTRATION AND BREAKFAST AT 7:30 AM
9:10 AM - 12:00 PM**

"CLINICAL CONCEPTS AND NEW DEVELOPMENTS IN REGENERATIVE AND PLASTIC-ESTHETIC PERIODONTAL SURGERY"

DR. ANTON SCULEAN

University of Bern, Switzerland

Synopsis

Reconstructive procedures in periodontology aim at regenerating the lost periodontal supporting tissues, which have been lost following periodontal disease. During the last decades, several treatment modalities including the use of bone grafting materials, barrier membranes, enamel matrix derivative (EMD), some types of growth factors or various combinations thereof, have been shown to promote periodontal regeneration (i.e.) formation of cementum, periodontal ligament, alveolar bone and gingiva) to a varying extent.

In recent years, a better understanding of the biology, combined with improved surgical techniques yielded to clinical concepts enabling predictable treatment outcomes in intrabony, furcation, and also recession-type defects. In carefully selected patients and defects, in conjunction with a strict pre and postoperative infection control, reconstructive periodontal surgery may lead to substantial regeneration of hard and soft tissues and clinical benefits evidenced by probing depth reduction, gain of clinical attachment, defect fill and improved esthetic outcomes. Moreover, longitudinal studies have also provided evidence for long-term stability of the clinical outcomes, thus pointing to the clinical relevance of these concepts in improving tooth prognosis. Very recently, new formulations of EMD such as Osteogain combined with various types of bone grafting materials or collagen matrices have been shown to positively influence periodontal wound healing/regeneration.

In the last years, the use of innovative surgical techniques such as the Modified Coronally Advanced Tunnel (MCAT) or the Laterally Moved Double Tunnel (LMDT) combined with connective tissue grafts or collagen matrices with or without EMD have been proven as predictable methods for obtaining predictable coverage of single and multiple gingival recessions, latest data indicating long-term (up to 5 years) stability of the results. In certain, well selected, cases the MCAT has been also successfully used to correct soft tissue defects around dental implants.

The present lecture will provide the scientific background for a biologically driven philosophy in reconstructive periodontal surgery while presentations of clinical cases and of surgical videos will demonstrate the step-by-step procedure of these concepts in various clinical scenarios.

**THIS PRESENTATION MADE POSSIBLE BY SUPPORT FROM
STRAUMANN USA**

ABOUT OUR SPEAKERS

Saturday, February 27, 2016 Session 2

1:30 - 4:30 PM

"25 YEARS OF VERTICAL AUGMENTATION: ESTHETIC CONSIDERATIONS AND NEW DEVELOPMENTS"

DR. MASSIMO SIMION

University of Milano, Italy

Synopsis

The history of Guided Bone Regeneration can be divided in 3 main periods: the Developing Period, the Consolidation Period and the Simplification Period.

The Development Period began in 1989 with famous study in rabbits from Dr. Dahlin and continued until 1996 when the final surgical technique has been well defined.

During the Consolidation Period the results were confirmed with retrospective and prospective clinical studies.

From 2005, with the beginning of the Simplification Period, Tissue Engineering techniques are used in order to reduce the complexity of the regenerative surgery and the morbidity for the patient. The use of growth factors could in a near future eliminate the need of the barrier membrane and of the autogenous bone harvesting from the patient, resulting in easier and less invasive surgical techniques.

THIS PRESENTATION MADE POSSIBLE BY SUPPORT FROM GEISTLICH PHARMA NORTHAMERICA INC AND OSTEOGENICS

Sunday, February 28, 2016

BREAKFAST AT 7:30 AM

8:00 - 12:00 PM

"HP3: CREATING AN HIGH PERFORMANCE PERIO PRACTICE"

DR. GREG TOBACK

Private Practice, New London, CT

Synopsis

In this presentation, Dr. Toback will explore the characteristics of great businesses and how it relates to the periodontal private practice.

What separates the top ten percent of periodontal practices from the rest? In changing times, how does the periodontal business model keep pace with increased pressure from competing sources of providers who perform similar procedures.

Dr. Toback will review the "Six Steps To A High Performance Perio Practice" and provide specific examples of how a periodontist can cultivate, develop and lead an exceptional team. He will address many important topics that are relevant in today's dental climate. In addition, Dr. Toback will provide "3 Secrets To Improved Practice Quality of Life" that you can implement immediately.

THIS PRESENTATION MADE POSSIBLE BY SUPPORT FROM ZIMMER/BIOMET

GRADUATE STUDENT EVENT

SATURDAY, FEBRUARY 27, 2016

4-5 PM IN THE DISCOVER ROOM ON THE SECOND FLOOR OF THE RENAISSANCE HOTEL

ADMISSION IS FREE

SEND FORM TO DR. GREG FAUTH OR REGISTER ONLINE AT MSPERIO.ORG/EVENTS AND MEETINGS/MEETING REGISTRATION

FORM NEEDS TO BE RECEIVED BY FEBRUARY 15, 2016

“What You Should Know Prior to the Purchase of Your First Periodontal Practice”

ROBERT E SEPTAK, PRESIDENT OF UNITED DENTAL BROKERS OF AMERICA

Bob earned an MBA from the Katz Graduate School of Business at the University of Pittsburgh and has a background as a controller for a number of small to large companies over the years, in both the service and manufacturing sectors. He has been involved with various mergers and acquisitions throughout his career, which included his oversight of Orion Power Midwest’s \$1.7 billion acquisition of Duquesne Light’s power plants in April 2000. Bob was part owner of a CPA firm prior to establishing United Dental Brokers of America (UDBA) in 2003. Bob is the President and founder of UDBA which sells all types of dental practices. They however have established a niche in the Periodontal field in the United States. They capped off their 2014 year with the sale of a \$ 6 Million + Periodontal Practice in Texas.

Bob has presented to a number of local dental societies including the Beaver County Dental Society and the Lawrence County dental society in Western Pennsylvania.

NOTE: To all periodontists that are considering selling a practice or interested in an associate, email your contact information to Dr. Leena Palomo, lvb3@case.edu. All residents who are interested in being an associate or purchasing a practice should also email Dr. Leena Palomo, lvb3@case.edu. The parties will be put in touch with each other with the possibility of a meeting at the cocktail reception that immediately follows the program.

CONGRATULATIONS

DISTRICT IV AMERICAN BOARD OF PERIODONTOLOGY NOMINATING COMMITTEE

Paul Ricchetti

AAP SPECIAL CITATION

OUTSTANDING TEACHING AND MENTORING IN PERIODONTOLOGY AWARDS

Clair Persteiner

Carol Walters

Renita Burrell

Michael Schmerman

Derek Borgwardt

Hsua-Liang Chen

Richard Gilman

Peter Birek

Abdulrahman Al-Osman

NOTICE OF A CHANGE IN THE CONSTITUTION AND BYLAWS OF THE MIDWEST SOCIETY OF PERIODONTOLOGY:

Article II of the Constitution currently reads as follows:

ARTICLE II -- PURPOSE

The purposes of this Society are:

- SECTION 1. To unite a group having a common interest in the art and science of periodontology;
- SECTION 2. To advance the art and science of periodontology;
- SECTION 3. To enlighten the public as to the role of periodontology in regard to general health and public welfare;
- SECTION 4. To cooperate with area dental education institutions by fostering periodontal education at all levels;
- SECTION 5. To stimulate interest and education for general practitioners in the area through clinics and seminars;
- SECTION 6. To further increase understanding and cooperation with the medical and health services.

After consideration by the Strategic Planning Committee in reviewing the purpose of the Society, it was recommended to the Executive Board that item #5 be removed from the Constitution as the MSP in its current state does not have the resources or capacity to do this. The Board has approved this change.

It is proposed that the new Article II read:

ARTICLE II -- PURPOSE

The purposes of this Society are:

- SECTION 1. To unite a group having a common interest in the art and science of periodontology;
- SECTION 2. To advance the art and science of periodontology;
- SECTION 3. To enlighten the public as to the role of periodontology in regard to general health and public welfare;
- SECTION 4. To cooperate with area dental education institutions by fostering periodontal education at all levels;
- SECTION 5. To further increase understanding and cooperation with the medical and health services.

According to the Constitution, this change must be submitted in writing to all voting members at least sixty (60) days prior to the date on which the vote will be taken. In this case, that date is February 27, 2016.
