Change of Venue.....	5

PRESIDENT'S MESSAGE

As I write this, winter has arrived in its full glory. It's time to bundle up for the holidays, refocus our practices, and plan to meet at the Midwest Society of Periodontology Annual Meeting in Chicago from February 27th through March 1st, 2015.

This is my last newsletter as president of the MSP. It has been a busy and quick year with some interesting changes. Our board and committees continue their work behind the scenes redesigning our logo, developing a strategic plan, completing necessary committee work to maintain our effectiveness, and putting the finishing touches on our programs for the 2015 annual meeting in Chicago.

I'd like to thank the board, all our committees, and especially our executive director, Dr. Greg Fauth, for their dedication and support this year. Without their help, the MSP would not remain relevant. Our continued success is dependent not only on your ongoing support, but also on your willingness to participate, not only at the annual meeting, but also on committees and in the governance of the MSP. We are blessed to have incredible volunteerism and amazing talent in our organization.

I hope to see you all at the upcoming MSP Annual Meeting in Chicago. The meeting will focus on a perio restorative theme to stress the importance of team management of cases and the special connection between the periodontist and the restorative dentist. At our limited attendance session on Friday, February 27th, Dr. Danny Melker will discuss surgical crown lengthening, biologic shaping, perio management of natural teeth in the restorative case, and predictability for long term success.

On Saturday, February 28th, prosthodontist Dr. Stephen Chu will focus on how the periodontist can assist in enhancing restorative outcomes, and how periodontists can increase perio referrals of restorative cases. On Sunday, March 1st, Dr. Cary Shapoff will present "Achieving Ideal Implant Esthetics — Managing the Hard and Soft Tissue Zones". His program will include a discussion of team issues, sequencing, smile analysis, and how soft and hard tissue issues affect implant esthetics.

These programs are an opportunity to revisit the perio restorative connection that is the foundation of a thriving and successful periodontal practice. They are especially pertinent in today's private practice environment where building and sustaining a perio practice may be more challenging. I encourage you to invite your restorative colleagues to this meeting to share these topics of common vital interest that affect our perio and their restorative outcomes and practices. In my own experience, marketing to the perio restorative connection is a major practice builder.

A special thanks to Dr. Constantin Farrah for his countless efforts in putting together these special programs for our 2015 annual meeting.

I hope you will also join us early Saturday morning at the annual meeting for the Graduate Student Research Forum. It is an opportunity to experience quality research and to support our graduate programs. Periodontal graduate programs are the life blood of our specialty and we all owe a debt to our training institutions. They, as does the MSP, depend on your support and commitment to remain viable entities in the maintenance of a strong specialty of periodontics.

The Luncheon for Learning on Saturday is a convenient way to eat and relax during the midday break while listening to a short and interesting presentation. Take advantage of this special format to validate or increase your expertise on a topic of interest.

After our Saturday program in Chicago make it a point to stop at our annual open Awards Ceremony/Cocktail Reception. It is an opportunity to applaud the winners of the Graduate Student Research Forum, connect with your colleagues, and rehash the day's events.

Our thanks to Sunstar Americas, Inc. for their sponsorship of the Research Forum and the Awards Ceremony!

In closing I'd like to thank you, our members for the opportunity to serve. It has been an honor and a privilege. Happy Holidays! See you in the end of February in Chicago.

Paul Ricchetti

MEETING SCHEDULE

FRIDAY, FEBRUARY 27, 2015	
8:30 am	Registration and Beverages
9:00 am	Dr. Melker (additional fee/limited attendance) Sponsored by Dentsply Implants, North America
12:00 pm	Lunch
3:30 pm	Presentation ends
SATURDAY, FEBRUARY 28, 2015	
7:30 am	Registration and Continental Breakfast
7:45 am	Graduate Student Forum Sponsored by Sunstar Americas
8:55 am	Introduction — Dr. Constantin Farah
9:00 am	AAP President Dr. Joan Otomo-Corgel
9:10 am	Dr. Chu Sponsored by Biomet 3i and DentiumUSA
10:30 am	Refreshment Break
10:50 am	Dr. Chu
12:00 pm	Luncheon for Learning
1:30 pm	Dr. Chu

SATURDAY, FEBRUARY 28, 2015 - CONTINUED	
2:45 pm	Refreshment Break
3:00 pm	Dr. Chu
4:00 pm	Midwest Society of Periodontology Business Meeting
4:00 pm	Graduate Student Event
4:15 pm	District IV Meeting
5:00 pm	Awards Ceremony / Cocktail Reception Hosted by Sunstar Americas
SUNDAY, MARCH 1, 2015	
8:00 am	Continental Breakfast
8:30 am	Dr. Shapoff Sponsored by BioHorizons
9:45 am	Refreshment Break
10:00 am	Dr. Shapoff
12:00 pm	Adjournment

LUNCHEON FOR LEARNING

DR. HSUN-LIANG CHAN — TABLE 1: ASSESSING SOFT TISSUE BIOTYPE FOR VERTICAL RIDGE AUGMENTATION

DR. TOLGA FIKRET TOZUM — TABLE 2: PERI-IMPLANT DISEASES: PREVENTIVE METHODS, RISK FACTORS AND TREATMENT OPTIONS

DR. IMAD NOUNEH — TABLE 3: IMMEDIATE PROVISIONAL RESTORATIONS FOR SINGLE IMPLANTS

Placing implants in the esthetic zone is a challenging procedure. Placing the right temporary restoration at the time of implant placement can enhance the esthetic outcomes. The discussion will include:

- Types of provisional restorations
- Advantages and disadvantages of each restoration
- Making immediate screw retained provisionals. Why, when and How? Step by step technique and scientific rationale

DR. NANCY NEWHOUSE — TABLE 4:

- Periodontal disease prevalence in the United States
- Periodontal disease as a major public health issue and implications of the perio-systemic link
- "Love the Gums You're With" objectives and features
- 2014 campaign overview + features of 2015 launch
- Member toolkit resources — how members can leverage the campaign in their own communities

DR. MARTIN KOLINSKI — TABLE 5: NARROW DIAMETER IMPLANTS WITH AN EMPHASIS ON ADOLESCENT PATIENTS

- Patient evaluation — Smile Line, PA's CBCT, Ortho considerations
- Space Limitation Problems
- Narrow Diameter implant types
- Growth and Timing for Implant Placement
- Ridge deficiencies and how they are managed

DR. ALAN DELASSANDRO — TABLE 6: APPLICATIONS OF LASERS IN PERIODONTICS

- Laser Types
- Target Tissue
- Effects
- Procedures

ABOUT OUR SPEAKERS

Friday, February 27, 2015

**REGISTRATION AND BEVERAGES AT 8:30 AM
9:00 AM - 3:30 PM WITH LUNCH AT NOON**

IDEAL PERIODONTAL CONCEPTS FOR COMPREHENSIVE PERIO-RESTORATIVE CASES

DANIEL J. MELKER, D.D.S.

Private practice, Clearwater, Florida
Lecturer, University of Florida Periodontic and Prosthodontic graduate programs

Saturday, February 28, 2015

**REGISTRATION AND BREAKFAST AT 7:30 AM
9:10 AM - 3:00 PM WITH LUNCH AT NOON**

PROSTHETIC STRATEGIES IN PERI-IMPLANT MUCOSAL TISSUE PRESERVATION OF IMMEDIATE IMPLANTS: THE PERIODONTAL-RESTORATIVE INTERRELATIONSHIP IN COMBINATION THERAPY

DR. CHU

Clinical Associate Professor in the Ashman Department of Periodontology and Implant Dentistry at New York University College of Dentistry.
Private practice in fixed prosthodontics, aesthetic, and implant dentistry in New York City.

Synopsis

This course will emphasize the Periodontal approach in treating comprehensive periodontal and restorative cases.

Learning Objectives

- Diagnosis as it relates to Restorative treatment.
- Understanding Attached Gingiva as it relates to restorative dentistry. A surgical discussion will be undertaken as to when to treat insufficiencies as well as various modalities to accomplish these results.
- Cores and Provisionals, their importance in periodontal surgery.
- Biologic Shaping, an adjunct to conventional periodontal surgery.
- Biologic width as it relates to restorative dentistry and the importance as it relates to the non invasion of this area.
- Cosmetics- periodontal and restorative understanding
- Altered Active and Passive Eruption. Treatment surgically to create ideal esthetic results.
- Margin location and materials for ideal Restorative outcomes.
- Predictability for long term success.
- A surgical discussion will take place.

THIS PRESENTATION MADE POSSIBLE BY SUPPORT FROM DENTSPLY IMPLANTS, NORTH AMERICA

Synopsis

Implant dentistry is continuously evolving offering new and more predictable forms of therapy with minimally invasive protocols. Innovative techniques now allow for better aesthetics, decreased treatment times, and greater patient comfort. However, these new techniques and therapies continue to raise questions and concerns regarding the risk and rewards of each. Specifically, controversial issues regarding immediate implant placement in the aesthetic zone.

This presentation will address current concepts, techniques, clinical research, histologic evidence, and innovations in immediate implant placement into extraction sockets and provisional restoration and how this can preserve and enhance not only treatment procedures and time, but also clinical aesthetic outcomes for greater patient satisfaction.

Learning Objectives

After this presentation, the attendee should be able to understand the following concepts associated with immediate implant placement and provisional restoration:

1. The prosthetic and biologic impact on peri-implant soft tissue thickness
2. Innovative subgingival restorative contour strategies for guided mucosal tissue preservation

Understand mucosal bleeding at 1st disconnection as a surrogate for tissue adherence on provisional restoration surfaces

THIS PRESENTATION MADE POSSIBLE BY SUPPORT FROM BIOMET 3I AND DENTIUMUSA

ABOUT OUR SPEAKERS

Sunday, March 1, 2015

BREAKFAST AT 8:00 AM

8:30 - 10:00 AM

ACHIEVING IDEAL IMPLANT ESTHETICS-MANAGING THE HARD AND SOFT TISSUE ZONES

CARY A. SHAPOFF, DDS

Diplomate, American Board of Periodontology
Past-Chairman, American Board of Periodontology
Private Practice Limited to Periodontics and Dental Implants
Fairfield, CT

Synopsis

This course, given from a clinical practice perspective, will present an evidence-based review of diagnostic and treatment factors including medical considerations and esthetic risk factors for dental implant surgical care. In addition, key issues of smile analysis, treatment sequencing, surgical considerations in evaluating and establishing the ideal hard and soft tissue foundation will be discussed.

This program will also discuss collaboration among the surgical team, orthodontic specialist and the restorative team members regarding the decision-making factors for the complex esthetic implant case. Attention to detail in planning and clinical treatment will result in a more predictable outcome for the patient. Finally, prosthodontic responsibilities will be presented from treatment planning, fabrication of the surgical guide and role of the proper provisional restoration, final restoration (abutment selection and design), managing the occlusion, cement vs. screw-retention and implant maintenance.

Learning Objectives

- Treatment options and sequencing
- Smile Analysis
- Enhancing Tissue Volume
- Shaping Tissues with Interim Provisionals
- Hard Tissue Considerations
- Implant design and selection
- Restorative considerations
- Maintenance Issues
- Cementation techniques
- Peri-implantitis strategies

THIS PRESENTATION MADE POSSIBLE BY SUPPORT FROM BIOHORIZONS

GRADUATE STUDENT EVENT

Getting Past Obstacles to Have Your Dream Career

HUI JIN LE, DDS, MSD

1000 W Wallings Rd St B
Broadview Heights OH 44147

Being in full time private practice does not mean that your learning will slow down. Instead it blends lifelong learning with teaching and participating in organized dentistry in a way that aims toward healthy fiscal growth during the log phase of your career. It requires balancing professional and personal goals, as well as time and money management.

VANCHIT JOHN, DDS., MSD

Diplomate American Board of Periodontology
Chairman, Department of Periodontics and Allied Dental Programs
Associate Professor
Indiana University School of Dentistry
1121 West Michigan Street
Indianapolis, IN 46202

The mission of the American Academy of Periodontology Foundation is to improve the periodontal and general health of the public through increasing public and professional knowledge of periodontal diseases and therapies, stimulating basic and clinical research to generate new knowledge, and enhancing educational programs at all levels to create opportunities in periodontal education and practice.

DAVID P. GAVIN, MD

Assistant Professor of Psychiatry
University of Illinois at Chicago
& Jesse Brown VA Medical Center
NIH Loan Repayment Program for Extramural research.

NIH wants to encourage outstanding periodontists in biomedical and clinical research. If you commit at least two years to conducting qualified research by a nonprofit or government entity, NIH will give you the freedom to pursue it by paying part of your qualified loan debt.

NOTE: All periodontists that are considering selling a practice or interested in an associate, email your contact information to leena.palomo@case.edu. All residents who are interested in being an associate or purchasing a practice should also e-mail **Dr. Leena Palomo**. The parties will be put in touch with each other with the possibility of a meeting at the cocktail reception immediately following the program.

CONGRATULATIONS

WILLIAM J. GIES AWARD

William Giannoble

DISTRICT 4 TRUSTEE

Timothy Walsh

AAP AWARD FOR OUTSTANDING TEACHING AND MENTORING

Dr. Paul Ricchetti
Dr. Daniel Shin
Dr. Andrew Dentino
Dr. John Francis
Dr. David Gaston
Dr. Satheesh Elangovan
Dr. Hector Rios
Dr. Mabel Salas

CHANGE OF VENUE

The venue for the 2015 Annual Meeting of the Midwest Society of Periodontology had to be moved to the Swissotel because of construction at our more traditional location, The Renaissance. In order to have adequate space and refreshments available, we are asking you to register for the meeting by returning the completed Registration forms to the Executive Director of the MSP. If you plan to stay at the Swissotel, there are links and telephone numbers provided on the registration page included with this newsletter.

SAVE THE DATE!
